

INVITATION

"Latvia's Economy in 2019" by Morten Hansen!

Where problems are? a) few, b) home-grown, c) mostly avoidable

Latvijas Banka states that Latvia's economic growth has been robust and balanced in 2018, continuing a momentum achieved already in 2017. What to expect from 2019? Can we look optimistically at Latvia's economy this year in the context of e.g. Britain and Brexit and the economic policies of the new government of Latvia?

Morten Hansen

Head of Economics Department, SSE
Riga
Member of the Fiscal Discipline Council of
Latvia
